

Novel coronavirus (COVID-19)

The COVID-19 novel coronavirus is a new strain of coronavirus affecting humans.

Some coronaviruses can cause illness similar to the common cold and others can cause more serious diseases such as Severe Acute Respiratory Syndrome ([SARS](https://www.who.int/csr/sars/en) (<https://www.who.int/csr/sars/en>)) and Middle East Respiratory Syndrome ([MERS](https://www.who.int/emergencies/mers-cov/en) (<https://www.who.int/emergencies/mers-cov/en>)).

This novel coronavirus is still new and as such we are still learning more about it.

Signs and Symptoms:

Symptoms reported in identified cases of COVID-19 novel coronavirus include:

Fever

Cough

Sore throat

Shortness of breath

Runny nose

Fatigue

Diarrhoea

Vomiting or nausea

Loss of smell and/or taste

Other symptoms people may experience include muscle or joint pain, and loss of appetite.

Everyone who gets COVID-19 will experience it a little differently.

People who have extreme symptoms or side effects from the virus may take weeks or months to recover fully, while people with a mild illness may feel completely better within a week or two.

Symptoms can vary depending on each case.

If you have a sudden onset of any COVID-19 symptoms, you should contact your local doctor or call 13HEALTH (13 43 25 84).

People with suspected COVID-19 will be [tested](https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/take-action/testing-and-fever-clinics) (<https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/take-action/testing-and-fever-clinics>).

Read about [novel coronavirus \(COVID-19\) symptoms compared to cold or flu](https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/find-the-facts/symptoms-of-novel-coronavirus-covid-19-comparison)
(<https://www.qld.gov.au/health/conditions/health-alerts/coronavirus-covid-19/find-the-facts/symptoms-of-novel-coronavirus-covid-19-comparison>).

Who is most at risk

Based on what we know about coronaviruses, those most at risk of serious infection are:

- people with compromised immune systems (such as people who have cancer)
- elderly people
- Aboriginal and Torres Strait Islander peoples (as they have higher rates of chronic illness)
- people with chronic medical conditions
- people in group residential settings
- people in detention facilities

To help protect people most at risk, we have recommended limits on [public gatherings and visits to vulnerable groups](https://www.health.gov.au/news/health-alerts/novel-coronavirus-2019-ncov-health-alert/coronavirus-covid-19-advice-for-public-gatherings-and-visits-to-vulnerable-groups)

Treatment:

There is no specific treatment for COVID-19 infection. Antibiotics are not effective against viral infections. However, most of the symptoms can be treated with medical care.

There is currently no vaccine for COVID-19 novel coronavirus.

Prevention:
